

**WORKStar**

## TOP TEN REASONS TO BUY AN INTERNATIONAL® WORKSTAR®

---

### Stronger, More Powerful Performance

- 1 From the dump to the worksite and everywhere in between—WorkStar® offers powertrain combinations from 210 hp to 475 hp, delivering the muscle needed for the most demanding jobs.
- 2 Double-sided galvanized steel cab means WorkStar can take a beating from any severe environment and come right back for seconds.
- 3 Strength-to-weight frame rail options are the strongest in the industry—with standard Huck-bolts to get through the mud, rock, snow and everything else the job throws its way.
- 4 Rock-solid cab with FEPTO mounted below the radiator to maintain maximum structural integrity.

### Driver Satisfaction

- 5 Synchronized service intervals and driver's-side fluid fills and checks—because the only way to take charge of a relentless blizzard or a deep rock quarry is to never miss a beat.
- 6 Wheel cuts up to 50° give WorkStar free reign over every corner of the site. And standard dual-steering gears on front axle ratings above 16,000 deliver the effortless steering needed to dominate your surroundings.

### Engineered to Work Smarter

- 7 Low cost of ownership—three-piece hood and standard breakaway mirrors simplify repairs to keep WorkStar going strong and out of the shop.
- 8 Put it through a construction site, a quarry or a snowstorm—WorkStar has several configurations specified for whatever the job calls for. Available in 4x2, 4x4, 6x4 and 6x6 from the factory.
- 9 The Diamond Logic™ Electrical System's simplified troubleshooting and automated tasks keep your mind on the job rather than the upkeep of your truck.
- 10 The depths of a rock quarry were not made with a truck in mind—The clean CA packaging of WorkStar reduces overall length to keep you maneuverable and ready to go anywhere, anytime.
